

**Open-Source Prerequisites for a10-vmware-template-internal (“Product”)**  
**IMPORTANT READ CAREFULLY**

To use the Product, the user must license and install the following third-party open source software, none of which are distributed with the Product. All such software is licensed and distributed separately by the owner of such software. A10 Networks has no responsibility for such software, nor does it provide any representation, warranty, or other attestation of it. Links to the specified components are provided below for your convenience only, however, it is up to you to: (i) confirm the license terms for such software as well as any use restrictions and requirements at the time of installation and (ii) comply with them.

Sl.No.	OSS component with license
